

Parzival LLC

Private Holding & Investment Group

Incorporated in Saint Christopher (St. Kitts) and Nevis.

Ultimately owned via a discretionary Cook Islands trust with a single ultimate beneficial owner.

About

Parzival LLC (“**Parzival**”) owns and controls groups of operating companies and deploys its own balance sheet through discretionary and systematic investing and trading in financial markets and select digital assets. All capital at Parzival is proprietary and generated from retained profits; Parzival does not manage third-party or external investor assets. Its mandate is to compound capital over decades while maintaining structural resilience, jurisdictional diversification, and operational independence.

Investment Focus

Parzival primarily invests in:

- Discretionary and algorithmic trading strategies in global markets.
- Software, data, and trading infrastructure supporting research, risk management, and execution.
- Select digital assets, associated market and custody infrastructure, and opportunistic special situations aligned with Parzival's core competence in markets, balance sheets, and technology.

Parzival builds **concentrated** ownership stakes across a focused set of companies—most often as founder, co-founder, or controlling equity holder—and orients them to reinforce one another rather than sit as isolated assets. Alongside this, it runs liquid investing, trading, and allocation mandates across public markets, select digital assets, and, where appropriate, real-world assets to maintain diversification, liquidity, and tactical optionality.

Governance and Risk

Parzival operates with a conservative posture on risk, liquidity, leverage, counterparties, and informational **privacy**, aligned with the asset-protection and continuity objectives of its discretionary Cook Islands trust and its exclusive use of proprietary capital. It maintains internal controls and engages external legal, tax, and compliance advisers in relevant jurisdictions, including St. Kitts & Nevis and the Cook Islands. All activities are conducted in line with applicable AML, KYC, and sanctions requirements, and Parzival transacts only with regulated financial institutions and professional service providers.
