

Parzival

Private Holding & Investment Company

About

Parzival LLC is a privately held holding and investment company, ultimately owned by a trust. We focus on long-term ownership of operating companies and selective direct investments, including digital assets and financial technology.

Our mandate is to compound capital over decades while preserving structural resilience and operational independence.

Focus

Parzival primarily invests in:

- Financial infrastructure, trading systems, and market-structure technology
- Software, data, and automation platforms
- Select digital assets and related infrastructure
- Opportunistic special situations aligned with our core competence

We typically take concentrated positions, work closely with operators, and prefer structures that offer both downside protection and asymmetric upside.

Governance

Parzival operates with a conservative approach to risk, liquidity, and counterparties.

We maintain robust internal controls and work with external legal, tax, and compliance advisers in the relevant jurisdictions.

All activities are conducted in line with applicable AML, KYC, and regulatory requirements.
